

**REPROGRAPHICS Digital Blueline  
File Preparation Directions**

Autocad files otherwise known as DWG files should be converted to one of the following formats: PLT, DWF, PDF, TIF or VIC so that we can print them on our Océ TDS 800 digital printer. *All submitted DWG files are subject to a \$7.50 conversion charge.*

When preparing plot files from Autocad, the preferred plot type is an Océ TDS 800 or Océ 9800 .plt file or other HPGL/2 .plt file.

Any questions, please call one of our Reprographics plotting technicians at 970-224-9999.
